PROJECTS

Personal Portfolio

[Link](#)

- Established an online presence with a personal portfolio website, created with HTML and CSS, offering a glimpse into my career and capabilities.
- Harnessing the power of CSS Grid, Flexbox, Media Queries and some custom CSS to create a visually stunning and responsive layout.

TinDog Clone

[Link](#)

- A simple but responsive website made with Bootstrap and custom CSS.

Dice Game

[Link](#)

- Engage in a simple two-player web-based Dice Game. Challenge a friend, roll virtual dice, and compete to win each round.

Simon Game Challenge

[Link](#)

- The Simon game is a classic memory and pattern recognition game where you need to repeat a sequence of colors and tones generated by the game.

Blog Web App

[Link](#)

- Is a dynamic and full-featured blogging platform built with Node.js.
- Users can compose and publish blog posts using a straightforward editor that supports text.
- The platform displays all blog posts in an easy-to-navigate interface, inviting readers to explore various topics.
